Intercom Collection

AAP have worked hard to bring you an all new range of intercom systems. Their ease of use and proven reliability have secured a well deserved spot in the New Zealand market. The 'CPT' range supports 2 door stations and up to 8 monitors.

CPT KIT A8

Open door/gate

Open audio

This hands free audio only intercom system can support up to 4 audio monitors and one door station.

It is cost effective and practical, making it perfect for audio recognition and gate/door access control on a budget.

CPT595TS

Audio intercom system

Open door/gate

Open audio

This hand set intercom system will do everything you need on a budget. It supports 4 internal handsets and one door station. Door/gate access control can be utilised by using the key button on the handset. A traditional, cost effective solution to access control.

Apartment Intercom System

The apartment intercom system supports 2 door stations (CPT-SAC550(C)) and up to 1000 monitors (CPT-MT320).

The monitors are available in black or white and can be assigned to a number on the door station keypad. Audio only monitors (CPT-MT360-T) are available as a cost effective alternative, or as an extra monitor on a video system. Up to 3 monitors can be grouped together for apartments with several rooms. This unit is also perfect for gated communities.

AES GSM Collection

Cellular intercom Systems

Made in Britain

(Cellphones shown not included)

The AES-GSM intercom systems are one of the most flexible on the market. They are capable of calling multiple numbers per button, making it impossible for unwanted intruders to determine whether you are home. These systems are available in 1, 2, 3, 4, 6, and 8 button variations, with an optional integrated keypad. Uses caller ID to turn your cell phone into a remote. These units are stylish, robust and easy to use, making them a great addition to your home or business.

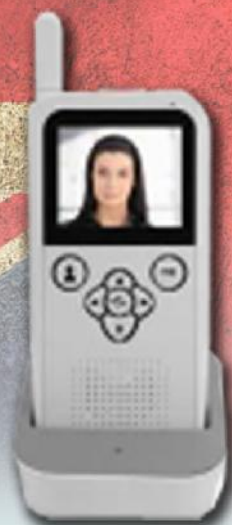

AES-605-ABK

Wireless video intercom system

Made in Britain

Optional non keypad door station available

Optional audio handsets can be added to this system.

The AES-605 wireless video intercom series is our top of the range wireless video system. This system is capable of transmitting video and audio 100m (line of sight) as standard.

Optional video boosters are available to give a range of 250m (line of sight). Up to 2 audio handsets can be added to cover a large area of your home or business.

The quality and usability of this product will not leave you disappointed.

AES-603-ABK

Wireless audio intercom system

Made in Britain

The AES-603 wireless intercom series is a perfect solution where cabling is not an option. These units can effortlessly reach 400m (line of sight) with zero loss of audio quality. Up to 3 hand sets can be added for multi room installations. This allows you to operate your door/gate from several points within your home or business. The door station is available with an optional access keypad.

(keypad option pictured above).
