CPT-GATE-E

An integrated video/keypad external gate station designed for New Zealand's harsh weather conditions. This is perfect for residential premises with the ability to add two gate stations to any one system. Either push the bell button for instant communication to the internal monitor, or just enter your unique entry code to operate a lock on your pedestrian gate

Cut Out Dimensions: L190mm x W95mm x D54mm
Face Plate Dimensions: L195mm x W100mm x D5mm

CPT-GATE E SHROUD

The refined stainless steel CPT-GATE-E comes standard as a flush mounted gate station. In certain installations flush mount is not an option which is why AAP offer the CPT-GATE E SHROUD. This shroud not only makes the CPT-GATE-E surface mount however also adds rain protection

Dimensions: L202mm x W108mm x D54mm

CPT-MON-8W

This 7" aesthetically pleasing monitor is one of AAP's most popular seller's, with its functional & sleek design. The monitor has a built in picture memory function allowing the user to review visitors or intruders with a time & date stamped image. You can have up to 4 monitors on any one system, offering you the ability to communicate with other internal monitors

Dimensions: L240mm x W160mm x D23mm

WELL-LPV-20-15

All monitors require a 15V power supply. The Meanwell 15V 1.3A switch mode power supply is perfect for this system. It has a IP67 case & 100 - 240VAC input

Dimensions: L116mm x W34mm x D27mm

SP RELAY-1A

Single Pole 12V 1A clean contact relay for operation of your gate or lock
