

# YS-138WR

12VDC Weather Resistant Electric  
Strike Lock, Fail Safe &  
Fail Secure

Specifications	
Voltage	12VDC
Current (standby)	0mA (fail secure position)
Current (operating)	300mA (fail secure position)
Material	Stainless steel & zinc alloy
Warranty	1 year
Dimensions	Face plate (L)124mm x (W)32mm
Weight	250g
Application	Wooden & Aluminium frames

12VDC electric strike lock for external doors/gates. Interchangeable from fail secure (power to unlock) to fail safe (power to lock) at the turn of a screw. Ideal for pedestrian gates and suitable for New Zealand weather conditions. Perfect addition to our intercom kits when used with our WELL-LPH-18-12 12V power supply.
