The Elite Security System is designed and manufactured in our purpose built
facility located in Albany industrial park.
On site we have a specialised team of software and hardware engineers complimented
by our lead free high speed pick and place manufacturing plant
and multi stage quality control system.
Each and every product we manufacture is tested in house and this start to finish process
control makes us so confident that we put a
5 year warranty on everything we build.
Exclusive technical support library on line and factory trained engineers
providing unprecedented levels of technical partnership.
Having this technical knowledge in house gives us the ability to service products fast.
Which is a huge plus for our imported product line, No delays with gear
needing to be sent off shore to find whether there is a fault or not.
