A1121 SURFACE-MOUNT

IP ACCESS CONTROL DEVICE

Keypad • 125 KHz and 13.56 MHz RFID Reader • Bluetooth Transceiver

The DoorBird A1121 is a compact, IP-based multi-technology access control system that can also be installed as a stand-alone solution. It enables secure access control in areas where the installation of an IP video door station is not possible or desired, e.g. at back and side doors, garages and underground garages, storage and packing rooms or bicycle and machine rooms. It can also control elevators. The keypad is illuminated, so you can install the device even in an unlit environment.

Thanks to its compact shape, the device can be easily installed on a door frame. The access control device is also ideal if you wish to create one-time or temporary access codes for visitors.

The device is designed for indoor and outdoor installation. The retrofit version is available for existing front panels. Our front panel is made of solid 3 mm (0.12 in) brushed stainless steel. All buttons are backlit.

The DoorBird A1121 can be connected to the network via WLAN or LAN cable. If connected using a network cable, the device can be powered via Power over Ethernet (PoE). Should the Internet temporarily fail, all functions continue to operate within the local network.

The DoorBird A1121 combines the functions of three separate access control devices:

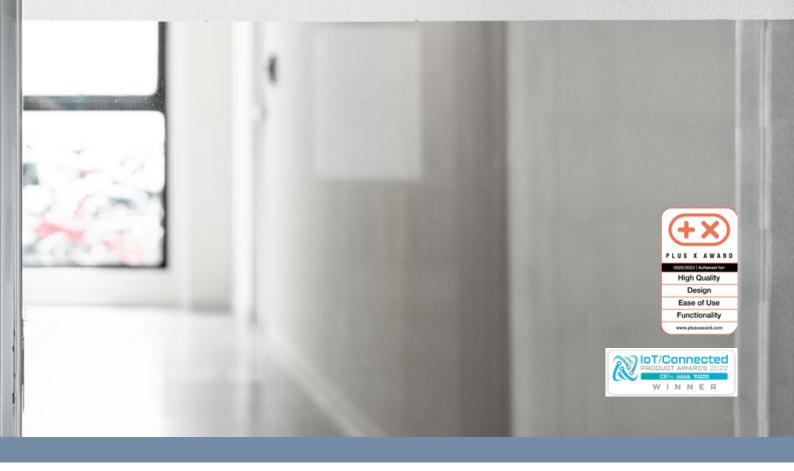

Keypad 125 KHz 13.56 MHz RFID Reader

Keypad

Bluetooth®

Apart from the network connection and power supply (PoE or 15 VDC), no further hardware is required. The software for the IP access control solution runs within the device.

The DoorBird A1121 is equipped with two relays and has a configurable Wiegand output interface for integration into an existing access control or alarm system.

Using HTTP(S) calls, you can also integrate the device with third-party home and building automation systems.

All settings can be configured remotely using the free DoorBird app or our web-based administration tool: https://webadmin.doorbird.com

You can define individual schedules, validities and actions for each PIN code, RFID transponder, etc. By pairing the DoorBird IP access control device with our DoorBird IP I/O Door Controller A1081, up to three additional gates, doors or elevators can be controlled in a tamperproof way, even if they are not located near the device.

The integrated tamper sensor can detect that the device is being removed and, for example, send a push message as an alarm in real time.

QUALITY MADE IN GERMANY

All DoorBird products are designed, developed and produced by Bird Home Automation Group in Berlin, Germany. We manufacture all products with the greatest care and precision, and deliver them to our customers all over the world.

TECHNICAL SPECIFICATIONS

	125 KHZ RFID READE	N.
3 mm (0.12 in)	Туре	Active Reader Passive Tag (ARPT) system
Front panel Available in brushed stainless steel V2A / V4A and V2A with bronze and titanium finish, DB 703, RAL 7016, Graphite Black (Raven Polar)	Standard	ISO/IEC 18000-2:2009 Part 2, EM4100, EM410
	Frequency	125 KHz
Polycarbonate	Range	0 - 3 cm, depends on environment
Surface-mounted. Flush-mounted and retrofit version sold	Compatible Transponder	RFID key fobs, sold separately, see www.doorbird.com/buy Up to 500 transponders manageable
15 - 48 V DC (max. 15 W) or Power over Ethernet (PoE 802.3af Mode-A)	Configuration	Via App, e.g. Tag (add, delete) Individual events (e.g. switch a relay, HTTP(s) notification)
· Individual PIN codes		· Individual schedules
(e.g. switch a relay, HTTP(s) request) Individual schedules	13.56 MHZ RFID READ	DER
	Туре	Active Reader Passive Tag (ARPT) system
Up to 500 PIN codes manageable Integrated	Standard	UID (CSN) of: MIFARE Classic®, MIFARE DESFire® EV1 and EV2, ISO14443A, ISO14443
250 g	Fraguency	ISO15693, NFC® (HCE support required) 13.56 MHz
LAN/PoE (T+, T-, R+, R-) 2 x Bistable latching relay (potential-free), max. 1-24 V DC/AC, 1 A, e.g. for electric door opener 15 - 48 V DC input (+, -), max. 15 W		
	Range	0 - 3 cm, depends on environment
	Compatible Transponder	RFID key fobs, sold separately, see www.doorbird.com/buy Up to 500 transponders manageable
		Via App, e.g. Transponder (add, delete) Individual events (e.g. switch a relay, HTTP(s) notification) Individual schedule
	Configuration	
128 x 62 x 28 mm (H x W x D)		
	WIEGAND INTERFACE	
Operating conditions Humidity 10 to 85 % RH	Direction	Output
(non-condensing)	Supported protocols	26, 30, 31, 34, and 44 bit
1x Main Electrical Unit with front panel 1x Wall mounting bracket 1x Power supply unit (mains adaptor) with up to 4 country-specific outlet adaptors (110 - 240 V AC to 15 V DC) 1x RJ45 adapter	Supported data output	125 MHz RFID transponder, 13.56 MHz RFID transponder, Keypad PIN codes
	Maximum distance to controller (cable length)	18 AWG: Max. 500 ft. (150m) 20 AWG: Max. 300 ft. (90m) 22 AWG: Max. 200 ft. (60m)
1x Quickstart guide with Digital Passport 1x Installation manual	Voltage	When no data is being sent, both DATAO and DATA1 are pulled up to the "high" voltage lev +5 V DC. The interface is galvanically isolated
see www.doorbird.com/warranty	INTEGRATED WIRELE	SS MODULES
EOUDEMENTS	WiFi	2.4 GHz
Mobile device: Newest iOS on iPhone/iPad, newest Android on Smartphone/Tablet	RFID	125 KHz 13.56 MHz (Configuration: either-or)
System requirements Internet: High-Speed Landline Broadband Internet connection, DSL, cable or fiber optic, no socks or proxy server	Bluetooth	Bluetooth Low Energy (BLE), compatible with DoorBird Bluetooth Keyfob Remote A8007
	THIRD-PARTY INTEGRATION (DOORBIRD CONNECT)	
Network: Ethernet Network, with DHCP	Partner integrations	see www.doorbird.com/connect
	API	see www.doorbird.com/api
Piezzo, for system messages	OPTIONAL ACCESSOR	RIES
	Sold separately	see www.doorbird.com/buy
RJ45 jack, PoE 802.3af Mode-A. 10/100 Base-T		
	Available in brushed stainless steel V2A / V4A and V2A with bronze and titanium finish. DB 703, RAL 7016, Graphite Black (Raven Polar) Polycarbonate Surface-mounted.
