

Secure. Adaptable. Professional.

Elite Surface & Flush Mount Security Cabinet

VAULT.

Powered by **EliteAlarms**

EliteAlarms

elitealarms.com

Built for Installers. Designed for Performance

Introducing our purpose built Elite**Alarms** security cabinet for high end residential and small to medium commercial installations. Unlike generic enclosures, this cabinet is engineered with the Elite security system in mind. It offers the space, mounting flexibility and cable management required to neatly accommodate control panels, expanders, power supplies, wall/lid tamper switches and batteries, all within a robust, secure enclosure.

Features

- Surface or Flush Mount (EC-CAB PRO FLUSH sold separately)
- Compatible with EC & EC-i, expanders & power supplies
- Removeable hinged lid for easy access
- 2 x Flush & 2 x Surface GPO locations
- Conduit and trunking entry points
- Built in cable management tie locations
- Integrated shelves for 12V 7.5A, 9A & 18A batteries
- 2 x Wall/lid tamper locations (EC-TAMPER M sold separately)
- Spring clip lid with optional cam lock
- Discrete, efficient heat dissipation

Everything you expect, and more

Offering Flexible Application Capability

Whether you're designing an intrusion, access control, or fully integrated security solution, the EC-CAB PRO delivers the space, flexibility, and scalability required to support a wide range of installation types and system sizes. Below are three example system configurations, showcasing the versatility and adaptability of the EC-CAB PRO.

Cabinet Example 1 | Integrated Security

EC or EC-i
Control
Panel

5 x EC-Z8
Input Expander
Module

2 x EC-O4 or
EC-AC2 REX
Expander Module

2 x EC-SCC PSU
Power Supply
Module

2 x DM12-18PP or
DM12-7.5
Lead Acid Battery

Cabinet Example 2 | Intrusion

EC or EC-i
Control
Panel

7 x EC-Z8 &
1 x EC-O4
Expander Module

2 x EC-SCC PSU
Power Supply
Module

2 x DM12-7.5
Lead Acid
Battery

Cabinet Example 3 | Access

EC or EC-i
Control
Panel

5 x EC-AC2 REX
Expander
Module

1 x EC-SCC PSU & 2 x
EC-SCC PSU5
Power Supply Module

2 x DM12-18PP &
1 x DM12-7.5
Lead Acid Battery

Built Around Your Installation

Designed for both surface and flush mounting, the removable hinged lid can be configured left or right for flexible access, and the enclosure also includes four GPO locations (two for flush mounting and two for surface mounting), plus multiple 20mm and 25mm conduit entry points and top and bottom trunking access for versatile cable routing.

Built with practicality in mind, the cabinet is stepped 6mm off the wall to allow for rear cable runs and press fit clips for power and data components, while extra internal width, integrated cable tie points, and SLA battery tabs enable clean, organised cable management without additional brackets.

Compatible Products

Complete your installation with purpose built Elite modules, power solutions, and expansion accessories designed to simplify installation and support future system growth.

Note: The EC-SCC PLATE and EC-SCC BATT are optional accessories that can be added to achieve a cleaner, more premium installation finish.

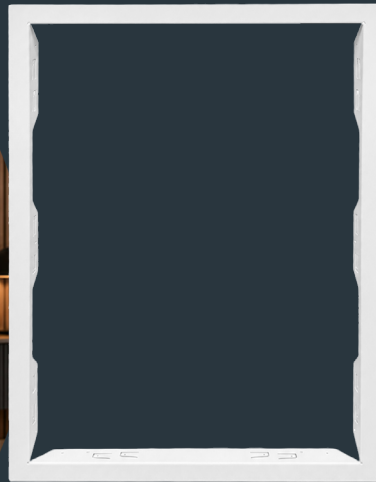

Achieve a Seamless Architectural Finish

The separately purchased EC-CAB PRO FLUSH ring transforms it from a surface mounted enclosure into a sleek, flush mounted solution that sits neatly within the wall for a clean, architectural finish.

The Professional Standard

EC-CAB PRO FLUSH

Enhanced Security. Added Flexibility

Enhance your system with optional accessories designed to provide an additional layer of security and protection. Adding tamper protection and lockable access to your EC-CAB PRO provides an extra level of security, helping protect critical system components from unauthorised access, interference, and accidental damage while giving the installation a more secure and professional finish.

EC-MET LOCK

Add a lock to your EC-CAB PRO for enhanced security. Ideal for installations where restricted access is required.

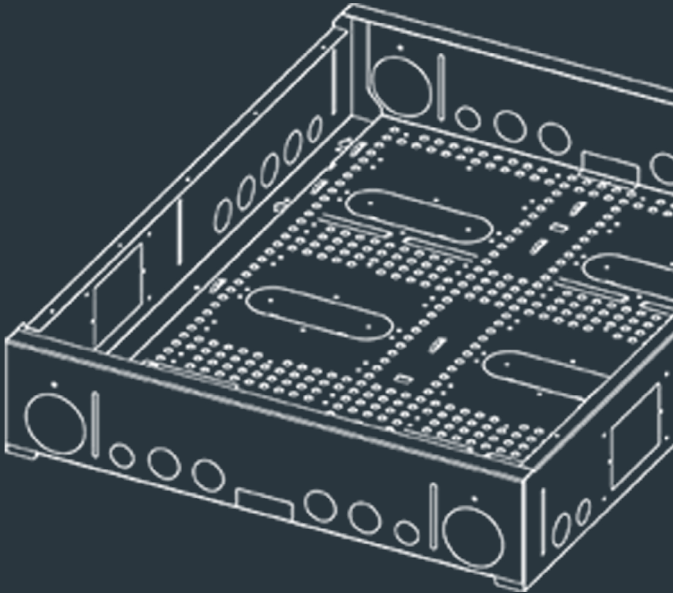

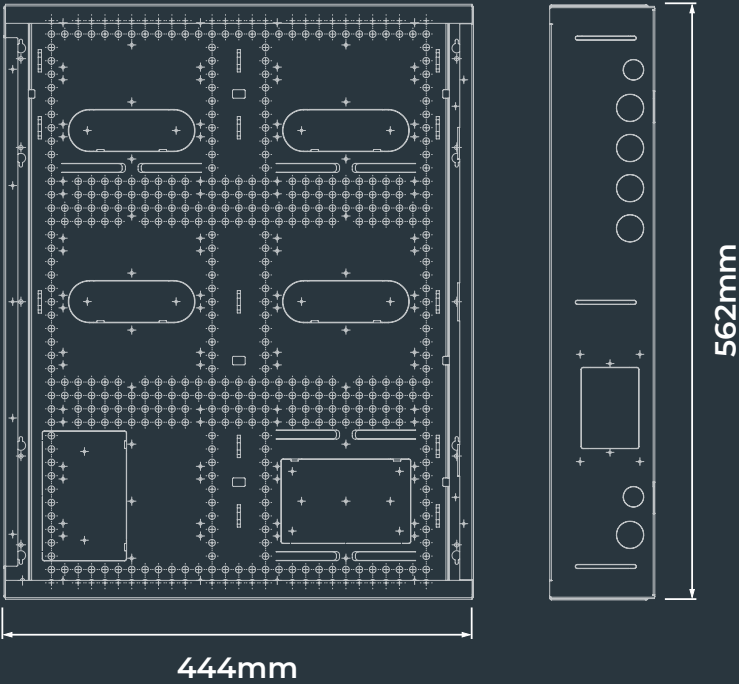

EC-TAMPER M

Provides wall or lid tamper detection to EC-CAB PRO helping to protect against unauthorised access and tampering.
