- New Zealand Made
- Plug & Play
- Personal SMS Monitoring
- Spark, Vodafone & 2 Degrees
- CSV, Patriot LS-30 & AAP Encrypted

No Hardware Contracts

5 Year Warranty

PROUDLY MADE IN NZ

The ESL-2 4G POD <u>plugs directly onto</u> the ESL-2 board, converting Contact ID signals to data for monitoring over IP. This unit is fitted with an Ethernet port & a sim module for Ethernet only, cellular only or back up cellular monitoring. Email or text monitoring is supported for personal monitoring purposes in the form of custom text or email messages. These include Mains failure, battery failure, zone activations, panic, fire, restores & more

All information is programmed into the ESL-2 4G POD via a built in web browser, allowing monitoring for new & existing systems to be programmed off site

The ESL-2 4G POD talks directly to the desired monitoring station with **no intermediate host and no ongoing hardware charges**. If 4G is not available the module will revert back to the 3G network. **Note:** Unit comes with Nano SIM holder but SIM card is not provided with the ESL-2 4G POD

Frequency Bands:

4G (LTE Bands)	3G Bands	GSM
FDD: B1/B2/B3/B4/B5/B7/B8/B28 TDD: B40	WCDMA: B1/B2/B5/ B8	850/900/1800/ 1900
