- |   |   |
|---|---|
| <br>Arm/Disarm         | <br>Stay in Arm/Disarm |
| <br>Glass Break Sensor | <br>Window Sensor      |
| <br>Indoor Sensor      | <br>Outdoor Sensor     |
| <br>Door Sensor        | <br>Garage Door Sensor |
| <br>Smoke Detector     | <br>Heat Sensor        |

### Control Functions

Up to 8 programmable outputs can perform control functions such as; garage doors, automatic gates, lighting, heating & more. Control can be utilised via the keypad, schedule functions, our additional remote kit or smartphone app for Apple & Android

### Monitoring/Smartphone

Consider adding the plug-in network module (ESL-2 APP POD) for app or monitoring, sending notifications straight to your smartphone. These alerts include sensor activations, panic, fire, mains failure, battery failure, restores & more

For land-line & 3rd party monitoring consider adding the plug-in (ESL-2 DIAL POD). For land-line monitoring you can call up to 8 numbers sequentially. Alternatively you can configure the system for 3rd party monitoring, sending contact ID information to a monitoring station of your choice
