FW2-TX IN BOX

The FW2-TX IN BOX transceiver is an advanced product that adds FW2 wireless devices to the ESL panel. The transceiver gives you the ability to add a wide variety of Two Way wireless products onto your alarm system

Integrating the FW2 Series into your ESL system will give you the ability to add wireless smoke detectors, PIR sensors, reed switches, external sirens, remotes & so much more. The FW2 range combines intelligent communication with a user friendly set-up ensuring straight forward installation
