

## 2 Way Wireless 1 Channel Transmitter

Infinity series long range wireless allows installers to specify professional, correctly positioned products without excessive labour, unpleasant trunking or conduit. With up to 500m range, almost any site can be accurately secured.

Take the INFINITY TX-B wireless transmitter. This can be used in any style of momentary switch gear, enabling control of your lights, heat pump, underfloor heating & more! Pair the INFINITY TX-B with either the infinity output or infinity link to activate anything you wish, this could be a simple and attractive button to open your garage door or automatic gate.
