

IP Monitoring

IP-MODULE

Universal LAN to PSTN reporting module with push notification function

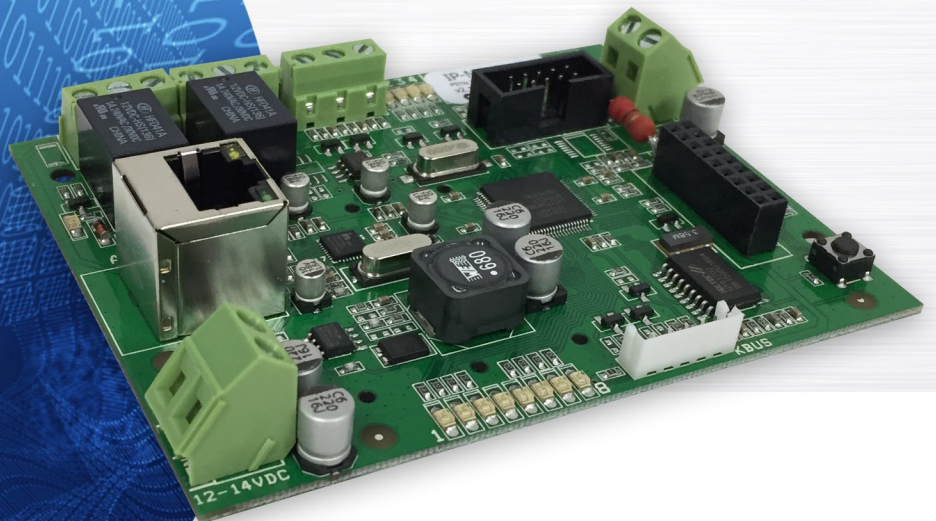

New Zealand Made

Contact ID Monitoring

Push & Email Notifications

Compatible With Elite Control App

CSV, Patriot LS-30 & AAP Encrypted

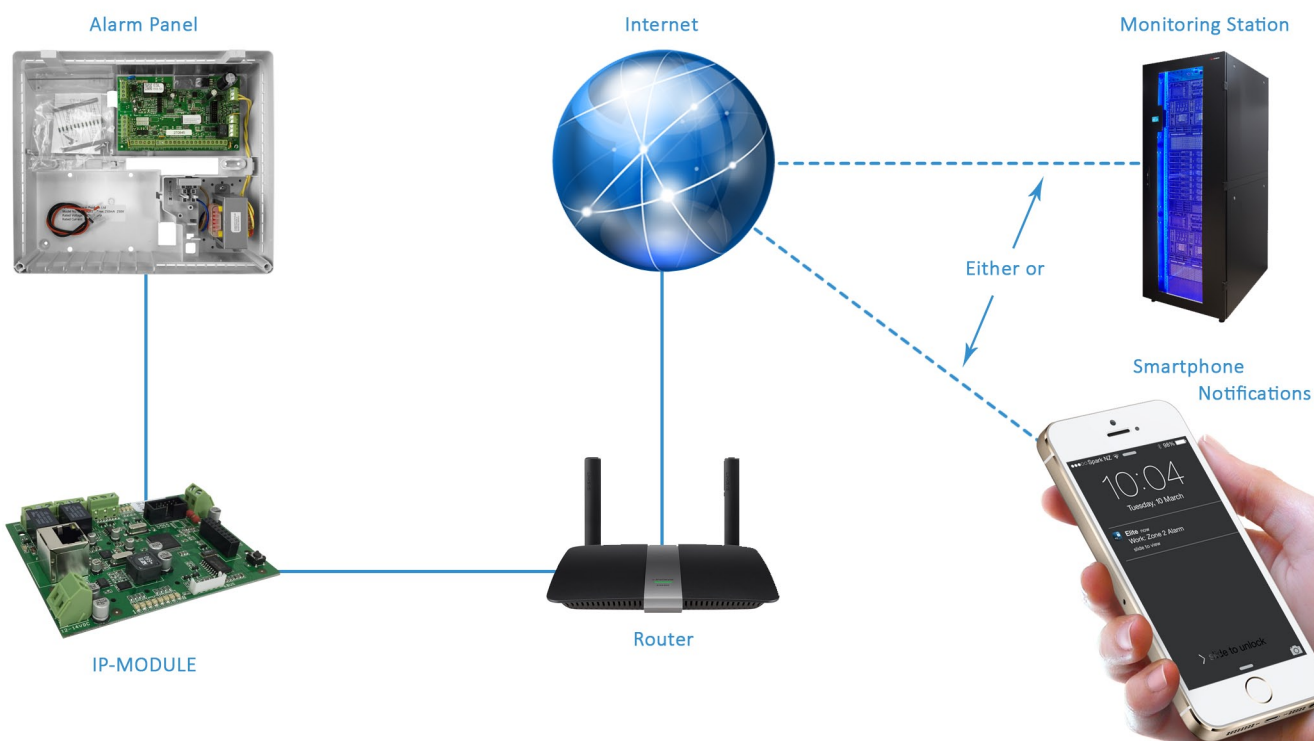

Multi Function

5 Year **Warranty**

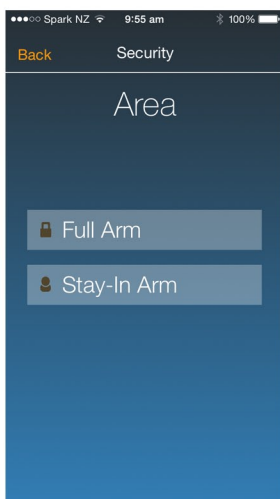

The IP-MODULE not only converts Contact ID signals to data for monitoring over IP, but also supports smartphone integration. Elite Control IP-MODULES can be used on any system with a Contact ID dialler & also **supports full app functionality when coupled with ESL, Elite S Lite & Elite S security systems**. App & Email monitoring is supported including mains failure, battery failure, zone activations, panic, fire, restores & more.

All information is programmed into the IP-MODULE via a built in web browser, allowing monitoring for new & existing systems to be programmed off site. If an existing alarm system is currently monitored using Contact ID the IP-MODULE can take over the monitoring without accessing the alarm panel programming.

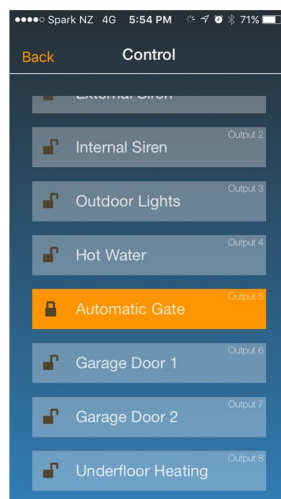

Smartphone App Functions (ESL, Elite S Lite & Elite S only)
