

4 Button 915MHz Remote

RM-915

Wireless Control

Designed for dependable performance in access control and alarm installations. This remote is a direct replacement for the RM-8006B and RM-8003B, making it a reliable swap-in option. The durable black casing with blue accents ensures it stands out for easy identification on-site.

The RM-915 can perform up to 4 alarm functions including arm/disarm, garage doors, gates, lights & more.

Features

- 4-button design for multiple functions
