

Multi-Purpose Wireless Module

Wifi KIT EXT

Dependable performance in security, IoT, & networking applications

EliteAlarms

Kit includes

- 1 x Pre-programmed Master Adapter
- 1 x Pre-programmed Slave Adapter

Ideal for bridging connections between control systems and remote devices, the WiFi Kit EXT uses pre-programmed master and slave adapters to seamlessly link internet sources with equipment requiring connectivity or control, making it especially suited for connecting your EC alarm panel to your router when cabling isn't an option.

Specifications

Operating Voltage	5 – 24 VDC
Power Consumption	10W max
Frequency Band	2.4 GHz
Range	Up to 50 meters (through walls)

Smart Status Indicators

Fast flashing blue light	Strong signal
Slow flashing blue light	Weak signal (reposition recommended)
Flashing green light	Network device detected

Connection

The WiFi KIT EXT includes two pre-programmed adapters

Master Adapter	Connects to your router or control system
Slave Adapter	Connects to the device requiring internet or control
