Touching the Event Icon will send a request to download the last 16 events stored in the systems memory.

This may take upto 30seconds

The list will display newest to oldest order.

Touching the Keypad Icon will take you to a virtual keypad terminal.

Here you can type in your standard Alarm codes to Arm and Disarm the System with the ability to Set either or both Areas (represented by the A & B icons, Red = Armed)

TROUBLE SHOOTING

Can not connect to your System?

1. Both your Smartphone and Alarm System must have Internet access.

2. Confirm the Site Serial number has not be changed, this can be changed from the System end to stop old users having access.

Can not control Output devices?

if touching on the Output device turns it Purple but not to Orange, then your system has not been confirgure for Output Control. Please contact your alarm technition to enable this feature

Garage Door Activ...

Can not Arm or Disarm using the Security Icon?

This comes down to not having entered a valid Password when doing the Intial setup.

You can change your Password by going to System > Users, then choose your profile.

System Events don't show the correct time and date?

If the time is not set correctly on your Alarm System then all the events will be recorded with the wrong time & date. The System User Guide tells you how to

change/update the system time and date.
